

WE ARE NOW CHG-MERIDIAN

The CHG-MERIDIAN Group acquires NF Techfleet in the Nordics

In 2018 CHG-MERIDIAN acquired a 100% shareholding of NF Techfleet, making NF Techfleet a part of the family owned international CHG-MERIDIAN Group, one of the internationally leading independent technology managers.

Effectively 1st of April 2022, the full merge of these companies takes place and together form one CHG-MERIDIAN. This to ensure the strongest foundation for CHG-MERIDIANs technology fleet offering in the Nordics.

For our customers and suppliers, business will continue as usual as a result of this transfer and your contact person from NF Techfleet has probably already been in contact with you and informed you about the merge.

The merge means that NF Techfleet from the 1 April is called CHG-MERIDIAN and we get new contact information, website and logotype. We recommend you to update your supplier register with our new name and contact information accordingly to the blue box.

Together with us, companies will be able to expand today's services, thanks to our wide portfolio of solutions that covers the whole lifecycle of their equipment.

We can help our customers with:

- Global technology solutions covering all major countries worldwide, including Americas, ANZ etc.
- Flexible financing within the IT, Industry- and Healthcare sectors
- Support towards a more sustainable business with our carbon-neutral financing solution
- Sustainable and eco-friendly refurbishment and remarketing of old equipment at our own Technology Centers – all in line with the principles of a sustainable circular economy.

GREEN TECHNOLOGY WITH CARBONZERO

Thanks to carbonZERO, our own extended financing solution, our customers can pay to compensate for all CO₂ emissions emitted by their IT & Industrial equipment.

This financing option is available internationally, and the money generated is used to fund certified projects aimed at combating climate change. The monthly leasing fee increases only marginally.

In return, the customer gets one certificate as proof of the amount of CO₂ emissions saved.
